*Web portal solution for team management. More that 100 team members per project are efficient working each day with the team portal. Professional quality of your services covered requirements management, software development and maintenance.*

Renata – Project Manager

## Our clients say

**mafotools**

Mafotools GmbH,  
Germany

*Ropardo proved seriousness and consciousness when accomplishing the objectives of the project, realizing this with highly professional specialists. Solution implemented successfully at key accounts: Audi AG and I&M AG.*

Michael - CEO

## Our clients say

**Posteitaliane**

Poste Italiane, Italy

*Over 65 000 points of sales are running the functional application provided by Ropardo. Software engineering full services including testing and implementation, provided by a reliable outsourcing partner who understood our demands and helped us accomplish our goals within schedule. Effective, efficient and economic software outsourcing – this is our experience in collaborating with Ropardo.*

Theodor – Project Manager

# NetCalcs: A Story of Success

Fully-equipped web app for US real-estate agencies

*What ROPARDO ingenious team did for us was more than just deliver based on requirements. The guys really helped us have our mission covered by flawlessly mastering web and mobile technologies. Implicitly, the 3-in-1 application was delivered on time and at high quality. Hence, we now have a successful ongoing collaboration.*

John Sable, CEO

# NetCalcs: A Story of Success

Fully-equipped web app for US real-estate agencies

Application delivered

## 4 weeks

- Business and requirements analysis
- Modules architecture
- Modular and responsive design

## 8 weeks

- Front-end: calculators, SPA, Login
- Back-end: API implementation
- Complex code documentation

Application upgrading ...

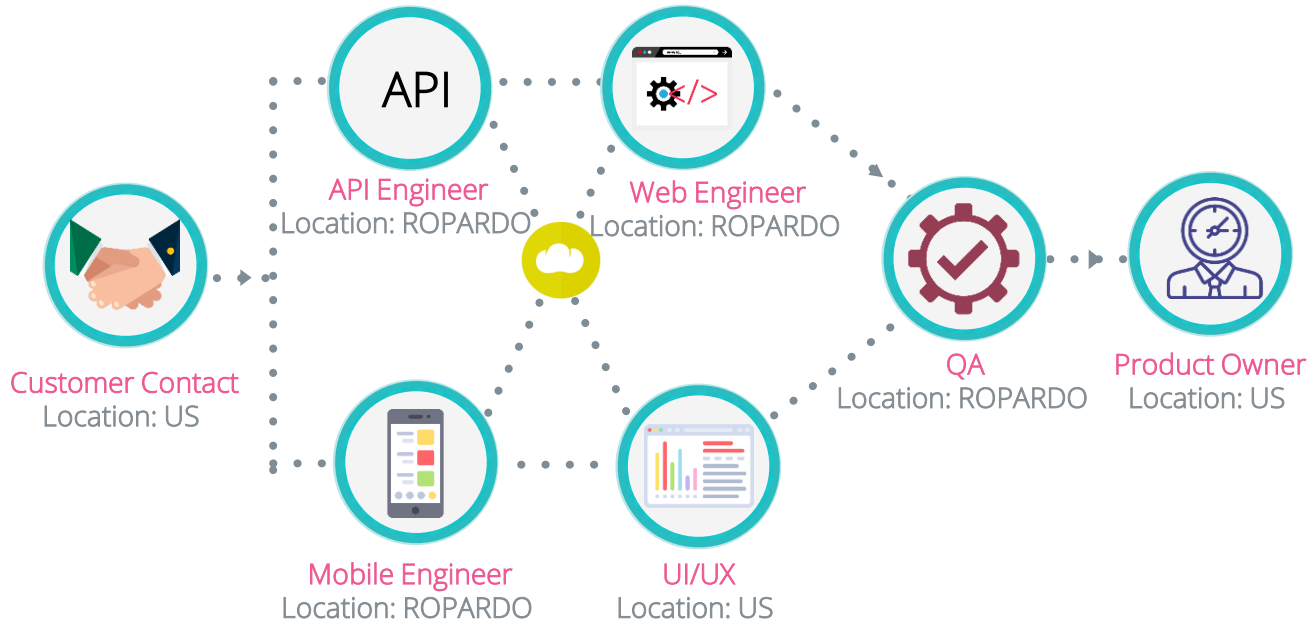

## Continuous development:

- Map with real estate agencies
- PDF report generator for 30+ end clients
- PostgreSQL to NoSQL
- Development of mobile apps
- Back-end API for the mobile applications
- Support based on end-user data collected by the app

# Being Agile in an Outsourcing Environment

Collaboration is a key to success in Agile team setup sample for product development

# ROPARDO RESEARCH & INNOVATION CENTER

We convert our 17 years of R&D results into marketable software solutions

ROPARDO is involved in steering consortiums (SME representative), leading the work packages and tasks for the implementation and exploitation of the knowledge-based system, decision support systems, e-Health, IoT, Cloud and Big Data technologies with the final end of optimizing production.
